Led engineering execution of an all-in-one client management SaaS platform serving 350+ users, owning frontend architecture, real-time collaboration, and delivery across CRM, projects, billing, approvals, and automation modules.

About

Full Stack Engineer with 5+ years of experience building and delivering scalable web applications, SaaS platforms, and digital products. Specialized in modern frontend engineering, with strong backend, API, database, and architecture experience.

I own products end to end, from setting technical direction and planning through execution and production delivery. Experienced in leading development teams, coordinating with designers and stakeholders, and making technical decisions that keep products scalable, maintainable, and on track.

Education

Bsc in Computer Science and Engineering

Dhaka International University

(2022 - present) Dhaka, Bangladesh

Skills

Technical Leadership & Management

- Technical direction, architecture decisions & system design
- End-to-end product and technical ownership
- Requirement analysis, technical scoping & effort estimation
- Sprint planning, task breakdown & delivery management
- Team coordination, code review & engineering standards
- Client & stakeholder communication, risk management

Frontend Engineering

- Languages & Frameworks: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3
- Styling & UI: Tailwind CSS, Shadcn UI, GSAP (animations)
- State & Data: Redux, Zustand, TanStack Query
- Forms & Validation: React Hook Form, Zod

Backend & Database

- Runtime & Frameworks: Node.js, Express.js, Firebase
- ORMs & ODMs: Prisma, Drizzle, Mongoose
- Databases: PostgreSQL, MySQL, MongoDB
- APIs & Real-time: RESTful APIs, WebSocket, Pusher
- AI-Assisted Development: Claude, Codex, Cursor, GitHub Copilot

Engineering Practices

- Scalable application architecture & clean code
- Performance optimization & responsive design
- Real-time systems & data visualization
- Debugging & production issue resolution
